Who: Cincinnati Park Board - Krohn Conservatory

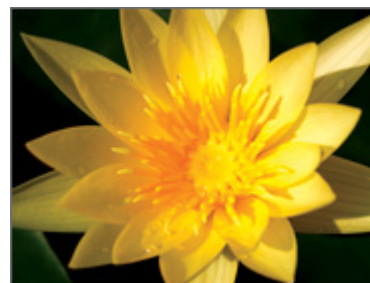

What: *Gardens of Jamaica* features a smaller scale representation of the famous Dunns River Falls to capture the spirit of the mountain landscape of Jamaica. The beautiful tropical foliage of the mountains gives way to the exotic colors of a variety of blooming annuals that inspired Captain Cook to establish the first botanical center on the island. Many introduced species of flowering plants, as well as plants native to Jamaica, will be included in the show.

While at Krohn be sure to tour through the permanent collection areas, to see other varieties of plants from Jamaica.

Open daily from 10:00 am - 5:00 pm

Where: Krohn Conservatory, 1501 Eden Park Drive, Cincinnati, Ohio 45202
